BASIC MODEL USER'S MANUAL

Dermapen™

Advanced skin needling

PURPOSE OF USE:

"DermaPen™" is intended to stimulate the skin for natural collagen induction. It helps with absorption of active ingredients, skin tightening, lifting and rejuvenation, acne scars and wound healing, improves wrinkles and fine lines, minimises pore size, improves stretch mark reduction, improves alopecia and more.

USER ACKNOWLEDGMENT:

We have been advised by Equipmed or the local representative that the National Recommendations for Standard Dermal Rolling Treatments which could apply to the DermaPen™ Procedures, is that only qualified health professionals should operate this procedure to the depth over 1mm. It is the responsibility of the user/purchaser to be aware of local recommendations and restrictions. It is the responsibility of the user to obtain appropriate insurance cover, if applicable. The basic model is designed for personal use.

ORDER OF TREATMENT:

Step 1. Cleansing:
Thoroughly cleanse the skin with an appropriate cleansing product, suitable to the type of skin being treated.

- For an optimal effect, it is advisable to remove dead cells of the stratum corneum with an exfoliating product or by scrubber (peeler, microderm, exfoliation treatment) before starting the treatment with DermaPen™.
- Remove all residue of the cleanser followed by a suitable antiseptic toner or wipe.

Step 2. Active Ingredients application:

- Apply uniformly on the treated region the product containing the active ingredients that will serve the purposes of the treatment. The numerous micro holes obtained due to the needles action will favour the deep penetration of the active ingredients in the skin.

Step 3. Treatment with DermaPen™:

1. Plug in adaptor and insert sterilised needle into the DermaPen™ tip
2. Turn on using speed setting. (Face speed :1~5<Thin, Sensitive skin 1~3><Thick skin 4~5>, Body speed :6~7)
3. Needle depth of DermaPen is set. Choose the speed that best suits the treatment area. See below as a guide:

Treatment area guide

REGION	THIN SKIN	THICK SKIN
Forehead	1-2	2-3
Between Eyebrow	1-2	2-3
Nose	1-2	2-3
Eye area	1-2	1-2
Cheek bone	2-3	2-3
Cheek	2-3	3-4
Lips	1-2	1-2
Scar Mark	4-5	4-5
Stretch Mark	6-7	6-7

4. With the free hand that is not holding the DermaPen™ handle, gently hold the skin or scalp taught. With the other hand holding the DermaPen™ handle,

- Start a circular action making little circles from right to left, for first pass.
- Second Pass, while exerting a constant pressure as shown in the picture below – treat from top to bottom
- Third Pass (if applicable) treat exerting constant pressure – treat diagonally
- Don't apply hard pressure

Step 4. Cooling, soothing and moisturising:

- Apply a soothing and moisturising product and/or facial cooling mask (or fibrella cloths soaked in ice water) on the stimulated or red region.
- Follow with a wound healing treatment cream.

Step 5. Post Operative Treatment:

- After the treatment, take precaution against sun exposure. Since the skin's channels are open for a period of time after treatments, it's recommended to use a sunscreen designed for sensitive skin and post cosmetic procedures. For more information please contact us.

PRODUCTS THAT ARE ADVISABLE TO BE USED IN COMBINATION WITH DERMAPEN™ ARE:

- Products capable of stimulating the collagen and elastin growth in the full dermal depth.
- Products stimulating the regeneration of cells
- Products containing essential nutrients for the epidermis and dermis
- Products favouring the blood circulation
- For more information please contact us for our recommendations.

PRODUCT THAT SHOULD BE AVOIDED WITH DERMAPEN™:

- Avoid additives in sunscreens
- Avoid any product that could damage the cells or tissues
- Try to avoid chemical additives including high glycolic and aha acids
- Avoid allergy causing materials
- Avoid perfumes and artificial colorants

WARNING TO USERS:

- Unseal the product just before treatment and make sure that the device does not touch other objects. (To avoid infection)
- Examine skin before treatment. The product can provoke side effects.
- Do not use the product if the date of validity has expired.
- Dermapen PRO and Semi models is sold exclusively for medical and approved salon professional use only (public general sales are prohibited).
- DermaPen needles are designed for single use only and must be disposed of in its original cap or in a sharps container.
- Do not exert excessive pressure when using the DermaPen™
- Avoid contact with the lips and eye contour (mainly the eyelids) given that the skin is thinner in these particular areas.
- Do not use the product on children or animals
- In case of a rash, allergic reactions or any other undesirable effect, stop using the product immediately.
- Be sure to check the seal, damage, or term of validity of the product before use.
- See 'User Acknowledgement'.

SIDE EFFECTS OF THE DERMAPEN™:

- It can cause an allergic reaction on patients who suffer from a cutaneous allergy to metallic products.
- It can cause acne eruption in patients suffering from advanced acne. Take into consideration acne before starting the treatment.
- It can cause pigmentation in patients with sensitive skin mainly if excessive pressure has been exerted while using DermaPen™ on the skin.

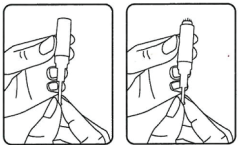
POSSIBLE COMPLICATIONS:

- Cutaneous eruptions
- Inflammations
- Itching and burning sensations
- Cold sore eruption

STORAGE:

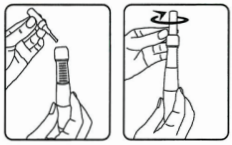
- Store the product in a well ventilated and dry place at room temperature
- Keep the product out of the reach of children
- This needle is a sterile medical device for single use. The needle must be used one time and be disposed of appropriately

Caution before use:
• Before inserting needle to DermaPen™ handle, check the needles condition

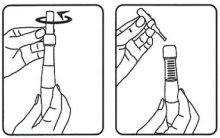


1. Grip the needles tail and push several times
2. Check needles spring and make sure the needle's smooth movement.

To insert needle:



1. Insert needle turning in a clockwise direction
2. Do not squeeze too hard.



To separate needle:
1. Hold the needle tip and turning counter-clockwise till needle comes out
2. Separate needle

Warranty:

1. This product is manufactured under strict quality control and inspection processes.
2. Warranty is to cover the operating defaults after the purchase during the warranty period (12 months after the purchase)
3. When this product goes out of order under the normal use of a customer, we will repair it free of charge during the warranty period
4. The damages (defaults) prescribed below are NOT to be covered by warranty.
   - Users faults by lack of care
   - Unauthorised electric currency connection defaults
   - Faults by the users own intention or unauthorised repairs
   - Damages caused by natural disaster. (Fire, Flood, Earthquake, lightning etc)
   - Replacement to new parts
